VELCRO® brand SHEAR-GRIP™  
fastening system and how it can  
be customized to maximize your  
product performance, call  
1-800-225-0180, ext. 4503.

Introducing the  
SHEAR-GRIP™  
Fastening System

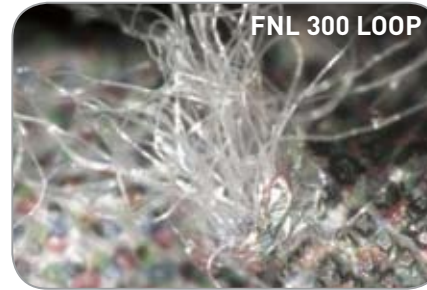

# Adhering to just about anything.

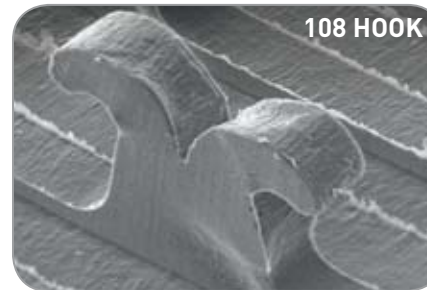

Velcro USA Inc., the world's first name in fasteners, is proud to deliver a truly new closure that can help give your current products a powerful hold in the marketplace. The VELCRO® brand SHEAR-GRIP Fastening System utilizes our new, exclusive hook and nonwoven loop design to maximize peel and shear performance. The result? An adjustable closure that adheres with entirely new levels of softness, convenience and comfort. Whatever you're designing, this system has it all.

The key to the VELCRO® brand SHEAR-GRIP Fastening System is the FNL 300, a nonwoven designed as a loop. FNL 300 "loop trees" stand up for maximum engagement with Velcro® brand hooks. Combined with a manufacturing process that delivers consistent weight across the web, customers enjoy highly secure fastening performance.

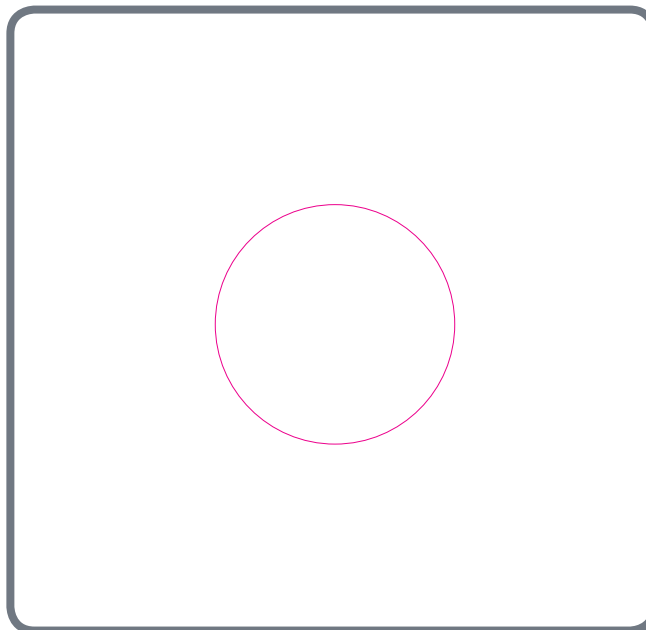

VELCRO® brand SHEAR-GRIP™ Fastening System utilizes a nonwoven (FNL 300) loop designed to maximize peel and shear performance.

VELCRO® brand 108 hooks engage FNL 300 loop trees to create a highly secure closure.

Try the peel and shear of the VELCRO® brand SHEAR-GRIP™ Fastening System for yourself.

The hook tab utilizes patented VELCRO® brand FLEX-ZONE™ technology to improve appearance and maximize production efficiencies.

## SHEAR-GRIP Industrial Applications

The Velcro® brand SHEAR-GRIP Fastening System is ideal for a full spectrum of industry uses: head/face rests; medical/surgical applications; protective/disposable food covers; environmental clothing, hats, mitts and barriers; filter materials; low-cost costumes; privacy curtains/bedding; and more—just about anywhere you need a strong fastener with a soft, sensitive side.

## We're on your team.

Velcro USA Inc. is committed to your creative process. Anything we can do to assist in the ingenuity of your product design is our first order of business. We have a depth of product offerings and available technical resources to help you customize and maximize systems for your product and production specifications.
