Description	A thread forming tapping screw with wider spaced threads than a Type-AB and a gimlet point.					
Applications/ Advantages	For self starting in thin (.015050 thick) metal or resin-filled plywood. 18-8 Stainless steel tapping screws may used in applications which require general atmospheric corrosion resistance. Fastening stainless steel parts to a num or steel can cause a type of corrosion known as a galvanic couple in some environments.					
Material	Steel: AISI 1016 - 1024 or equivalent steel. Stainless: Austenitic 18-8 stainless steel					
Heat Treatment (Steel only)	Screws shall be quenched in liquid and then tempered by reheating to 650°F minimum.					
Surface Hardness	Steel: Rockwell C45 minimum					
Case Depth (Steel only)	No. 6 diameter: .002007 No. 8 thru 12 diameter: .004009 1/4" and larger: .005011					
Core Hardness (after tempering)	Steel: Rockwell C28 - 38					
Plating	See Appendix-A for information on plating of steel screws.
